

GATOR XTREME EDGE

IDEAL FOR

- Drainage, open graded and permeable applications and overlay
- Pedestrian and vehicular use
- Concrete pavers, slabs, Natural and Wet cast stone applications

FEATURES

- High Performance polymers for added strength
- Reinforced with 3D micro-fiber mesh
- Formulated for better workability
- Continuous lateral support matrix
- Freeze and thaw resistant

XTREME EDGE VS CONCRETE MIX:

- 2X Stronger
- 2X Faster setting time
- More flexible
- Easier and faster to install

APPLICATION DIAGRAMS

Using established best practices, you will ensure the require base, setting bed and drainage of your hardscape project.

INSTALLATION STEPS

Always refer to the latest **Gator Xtreme Edge** Technical Data Sheet (TDS) at AllianceGator.com before installing Gator Xtreme Edge. Concrete pavers, slabs, Natural and Wet cast stones should be installed according to the industry established best practices for the base, setting bed, and drainage of a hardscape project.

STEP 1 REMOVING BEDDING MATERIAL

Remove all excess bedding material 10 cm at the edge of the hardscape project.

STEP 2 MIXING GATOR XTREME EDGE

Mix 1.7 liters of water with one bag 20 kg of **GATOR XTREME EDGE** until you obtain a homogeneous mixture.

STEP 3 TROWEL GATOR XTREME EDGE 30° ANGLE

Create a triangular shaped wedge of **GATOR XTREME EDGE** against the side of the pavement. With the help of a trowel spread approximately 10 cm of **GATOR XTREME EDGE** mixture at a 30° angle over the base material (Photo 1). Ensure that the **GATOR XTREME EDGE** covers any void spaces and at least 25 mm of the vertical side of the paver or 1/2 the height of the hardscaping material being used.

STEP 4 COMPACTION OF THE PAVED SURFACE

Final compaction of the paved surface with the **XP G2 SAND** should take place while the **GATOR XTREME EDGE** is still curing. As with **GATOR NITRO SAND** the paved surface should be compacted 90 minutes after **GATOR XTREME EDGE** installation.
