

## GATOR EDGE RIGID AND FLEX

**GATOR EDGE RIGID AND FLEX** are made with 100% Polypropylene Co-Polymer. This will give it great strength as well as provide great flexibility. We have a **Rigid** model which is ideal for straight applications and a **Flex** model that can be used for all curved applications such as walkways, paths, entrances etc. Both the **Rigid** and **Flex** can be locked together with the “Twist & Lock” system. Finally, the **Rigid** could be transformed into a partial **Flex** by cutting the bridge support between each triangular angle.

### FEATURES

- The **Flex** can connect to the **Rigid**
- Use a “Twist & Lock” connection system
- Will not corrode
- Easy-to-use
- Available in flexible or rigid edges
- **Xtra versatile**
- **Xtra robust system**
- **Xtra support strength**
- UV resistant
- Comes in 2.44 meters lengths

### INSTALLATION INSTRUCTIONS:

1. It can be installed either before or after the paver installation.
2. Use one 25 cm nail every second hole and at every “Twist & Lock” junction, this will ensure continuous lateral support. Ensure edges are installed firmly against the pavers on a minimal compacted structural aggregate base of 15 cm deeper and wider on all sides than the paved area.
